PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience specializing in the MERN stack and Generative AI integration. Expert in building scalable cloud-native systems using Node.js, microservices, and LLMs (Gemini, Hugging Face). Proven track record in developing RAG-based applications, real-time systems, and event-driven architectures with Redis and BullMQ. Experienced in designing high-performance database schemas using MongoDB, PostgreSQL, and vector databases (Pinecone) for efficient data retrieval. Skilled in building modern, responsive frontends with React 19 and Next.js, ensuring seamless UI/UX integration with complex backend logic. Strong background in AWS deployment, CI/CD automation, and implementing secure payment gateways for high-performance SaaS platforms.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend (MERN): React.js, Next.js, Redux, Zustand, HTML5, CSS3

Backend & APIs: Node.js, Express.js, NestJS, FastAPI, REST, GraphQL

Generative AI: Gemini, Hugging Face, Ollama, LangChain, LangGraph, RAG, AI Agents, Prompt Engineering

Architecture: Microservices, Event-Driven Architecture, Distributed Systems, Design Patterns

Databases: MongoDB, PostgreSQL, MySQL, Supabase, Pinecone (Vector DB)

Messaging & Queues: Redis, BullMQ, RabbitMQ

Real-Time: WebSocket, Socket.IO

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, NGINX, CI/CD (GitHub Actions, Jenkins)

Security: JWT, OAuth, RBAC, Passport.js

WORK EXPERIENCE

Software Engineer / GenAI Engineer

Sep 2025 – Present

Websultant Software Technologies Pvt. Ltd.

- Designed and developed scalable Node.js microservices for enterprise and product-based systems.
- Owned end-to-end feature delivery including requirement analysis, estimation, development, testing, and deployment.
- Built high-performance REST APIs using Node.js, PostgreSQL, MySQL, MongoDB, and Redis.
- Architected event-driven background workers and queue systems using Redis, BullMQ, and RabbitMQ.
- Developed real-time systems using WebSocket and Socket.IO for live data synchronization.
- Implemented CI/CD pipelines using GitHub Actions and Jenkins with Dockerized AWS deployments.
- Improved application performance, scalability, fault tolerance, and system reliability.
- Actively handled production debugging, monitoring, and Root Cause Analysis (RCA).
- Participated in Agile ceremonies, sprint planning, and peer code reviews.

Software Engineer / GenAI Engineer

Aug 2023 – Aug 2025

LCNC Technologies Pvt. Ltd. (DrapCode) – Noida

- Contributed to a large-scale no-code SaaS platform serving thousands of active users.
- Designed and implemented cloud-native Node.js microservices for onboarding, automation, and workflows.
- Built and consumed scalable REST APIs across multiple distributed services.
- Implemented Role-Based Access Control (RBAC), plugin systems, SDK features, and third-party integrations.

- Developed event-driven async workflows using background workers and message queues.
- Built a real-time AI voice assistant using WebSocket, authentication middleware, and large language models (LLMs).
- Improved system scalability, performance, and reliability through proactive optimization.
- Led debugging, RCA, and production issue resolution to maintain high availability.

KEY PROJECTS

DrapCode – No-Code SaaS Platform

- Built scalable backend services for onboarding, RBAC, plugins, and workflow automation.
- Designed event-driven workflows for AI-powered CRUD operations and data generation.
- Integrated MongoDB, PostgreSQL, Supabase, and multiple external APIs.
- Contributed to platform scalability, reliability, and SDK architecture design.

Voxing.ai – AI Workflow Automation Platform

- Architected a modular backend system supporting pluggable AI agents for enterprise workflows.
- Designed event-based communication layer for voice and chat automation pipelines.
- Implemented AI agents orchestration layer for intent detection, task routing, and multi-step workflow execution.
- Integrated Deepgram voice models for real-time speech-to-text processing in AI voice agents.

Nek Rishta – AI-Powered Matrimonial SaaS Platform

- Developed a subscription-based matrimonial SaaS application using Next.js and Node.js.
- Designed a hybrid database architecture using PostgreSQL (relational data) and MongoDB (profiles, preferences).
- Implemented AI-driven matchmaking and profile recommendations using Gemini AI.
- Built premium and featured profile boosting system with strict duplicate profile prevention.
- Designed secure authentication using JWT, sessions, and refresh token rotation strategy.
- Developed real-time chat using Socket.IO with handshake-level authentication.

High-Scale Web Applications (E-Commerce, Dating, Analytics)

- Designed and built backend systems for E-Commerce, Dating, and Analytics platforms.
- Implemented authentication, RBAC, real-time features, and asynchronous workflows.

EDUCATION

Master of Computer Applications (MCA) <i>Maharaja Agrasen Himalayan Garhwal University</i>	2024 – 2026 (Pursuing)
Bachelor of Science (B.Sc.) <i>Kanpur University – Unnao, India</i>	2020 – 2023
Intermediate (Class XII) <i>Board of High School and Intermediate Education, Uttar Pradesh</i>	2020
High School (Class X) <i>Board of High School and Intermediate Education, Uttar Pradesh</i>	2017
